

PCWI's extensive range of Internal Pipe Brushes are suitable for all High Voltage Porosity Detectors, Holiday Detectors, Spark Testers and Jeepers. Various brush types including spiral, disk and open style disks are available. Sizes range from 25.4mm (1") to 508mm (20") in diameter. All brushes are manufactured with 100µm rippled brass wire which provides greater brush strength.

FEATURES

- Brush sizes from 25mm to 508mm (1" to 20")
- Available in spiral and disc styles
- 100µm brass wire
